### Molecular Biology

| Test   | Result  | Reference Range       | Methodology             |
|--|---|-----------------------|-------------------------|
| COVID-19 by RT-PCR *   | Not Detected (Negative)   | Not Detected          | Multiplex Real Time PCR |
| Sample Type: <i>Nasopharyngeal / Oropharyngeal Swab</i>  |   |                       |                         |
| Interpretation Notes :   |   |                       |                         |
| Result   | Interpretation and Recommendations  |                       |                         |
| Detected   | If the result is detected, that means the sample is positive for SARS-CoV-2/Covid-19                                  |                       |                         |
| Not Detected   | If the result is not detected, that means the sample is negative for SARS-CoV-2/Covid-19.                             |                       |                         |
| Presumptive Positive   | Only one of the multiple genes is detected or a low viral load is possible. Request for repeat sample in 72-96 hours. |                       |                         |
| The false-negative result with clinical symptoms may be caused by  |   |                       |                         |
| . Unsuitable collection, handling, and/or storage of samples.  |   |                       |                         |
| . Sample outside of the viremic phase.   |   |                       |                         |
| We recommend repeating testing on a fresh sample   |   |                       |                         |
| LIMITATION OF THE TEST   |   |                       |                         |
| . This assay has been validated for use with an oropharyngeal swab and nasopharyngeal swab samples only.   |   |                       |                         |
| . This assay only detects RdRp, N gene, and E gene.  |   |                       |                         |
| . This test cannot rule out diseases caused by other pathogens.  |   |                       |                         |
