

Why?

How / What Changed?

What does that mean
for you?

Updated Content / New
Content

How to proceed, impact
on your course
progression etc.

This course got updated!

I re-recorded it from scratch (i.e. I created a brand-new course)

You get that update for free!

The new course is **inserted into**
this existing course

Why?

React evolved!

Most importantly: Functional components + React Hooks are the standard way of building components & apps going forward

I evolved!

I got tons of helpful feedback which I wanted to incorporate into this course

What Changed?

General structure is of course the same

But different approach for building components (functional + hooks)

All modules + lectures were replaced

New examples, demo projects, big modules were split up, important topics are covered earlier

Brand-New Content You Should Not Miss

In general: Check out the full curriculum and the **first course module** ("Getting Started")

In-depth **Next.js** Introduction
(Improve SEO, add SSR)

React.js Summary Module
(Great overview + summary)

New **Routing** Module
(with React Router v5)

New **Redux** Modules
(incl. Redux Toolkit)

New **Testing** Module

New **Authentication** Module

New **React + TypeScript** Module

Many new **Demo Projects & Examples**
(Explore all "Practice" or "Project" modules)

Soon!

What About The Old Course?

Old lectures **stay online until May 3rd** – **download links** are available thereafter

What Does This Mean For You?

You **didn't start** the course yet
(or you're at the very beginning)

You're **currently going through** the course
(beyond the first few sections)

You **completed** the course in the past

(Re-)Start with the updated course

If you can complete the old course until the removal: Do it!

You can ignore the update, though I do recommend that you take at least a look at it

Ignore the old course

Otherwise: Restart the course
OR download the old course to complete it offline

Download + save the old course if you want to *(but you don't have to)*

To regain your **course progress and certificate**: Manually mark the new course lectures as completed *(because it's still the same topic and content in the end)*
